I recommend labelling each cheat with a //comment to keep yourself organised Here's a larger example of a cheat pnach I created.. My codes for the patches are: all the keys- patch=1,EE,103F217A,word,00000101  
patch=1,EE,403F217C,word,00030001 patch=1,EE,01010101,word,00000000 patch=1,EE,103F218C,word,00000101 101  
Dalmatians- patch=1,EE,003F3393,word,000000FF patch=1,EE,203F3394,word,FFFFFFFF  
patch=1,EE,203F3398,word,FFFFFFFF patch=1,EE,203F339C,word,FFFFFFFF quick exp gain-  
patch=1,EE,103F1CD0,word,0000FFFF Thanks in advance.

Hmm, I'm wondering if anyone can help me with the kingdom hearts patch because I can't seem to get a few of the cheats working, such as the code that lets you have all 101 Dalmatians, have all the keys and Quick EXP Gain.. PNACH Converter is now version 2 01 Version 2 01 includes the following - Fixed RAW code conversion not padding leading zeros PNACH Converter converts PNACH files into the following formats: - RAW PS2 cheat codes - Unique HEX search/replace strings - Modified ELF's In order to convert a PNACH file to a set of HEX search/replace strings or to modify the original ELF the following are required: 1) The game's ELF file (ELF files can be extracted using ) 2) PNACH type must be byte, short, word, or extended with the first digit of the address as '0', '1' or '2'.. Pcsx2 Cheat converter: Pcsx2 Cheat converter is designed to change raw codes into pscx2 patch format and.. its cached there 0x20100000-0x21ffffff uncached 0x30100000-0x31ffffff uncached & acceleratade 0xa0000000-0xa1ffffff MIRROR might.
